

## Objective

I wish to be associated with a progressive organization where I would be able to contribute my skills towards the growth of the organization and where I get a chance to learn even more than I expect in terms of technology and management.

## Summary

- 7+ years of experience in leading the team and providing Technical solutions.
- 11+ Years of experience in developing web based applications.
- Proficient in FISERV / CORILLIAN Voyager 3.1
- Good Knowledge in Design Patterns.
- Proficient in developing application using ASP.NET, MVC, C# and ADO.NET.
- Extensive Knowledge on Front-end technologies such as HTML, CSS, JavaScript, JQuery.
- Implemented changes/Enhancements in the Enterprise application framework using Microsoft Technologies.
- 7+ Years of experience in Banking, 2 years in Ecommerce to Health Care and E-commerce Domains.
- Good Analytical Skills and urge to learn new technologies and Tools.
- Good Team Player, Leader and Quick Learner with excellent Communication skills.

## Organization

- "Appistoki Consulting Pvt Ltd" – Senior Consultant Since May 2017 to Till Date
- "Fiserv India Pvt Ltd" – Technical Lead Since September 2016 to May 2017
- "Sonata Software" as Consultant – C3 (Technical Lead) Since May 2014 to April 2016 (Deputed to **DELL**)
- "Odessa Technologies" at Bangalore as "Module Lead". Since August 2013 to May 2014.
- "SLK Software" at Bangalore as "Senior Engineer - Software". Since July 2008 to August 2013.
- "Compusol Software" at Bangalore as "Trainee" from Sep 2006 to Oct 2007

## Technical Skills

Programing Language : C# 1.0 – 4.0  
Platform : ASP.NET 1.1 – 4.5 , Windows Services, Web Services, ASP.Net MVC, WCF Services  
Database : SQL Server 2000 and above  
Scripting Language : HTML, CSS, Bootstrap, JavaScript, JQuery, TypeScript,  
Data Access Technologies : ADO.NET, Entity Framework, Voyager TP  
Design Modelling Tool : Star UML, MS Visio  
Debugging Tools : Fiddler, IE Developer tools.  
Versioning & Other Tools : TFS, Microsoft VSS, Tortoise CVS and SVN. Winmerge and WinDiff.

## Academics

- Completed B.C.A from Surana College, Bangalore University, and Bangalore in the year 2004 with 73% aggregate.
- (Pursuing) M.Sc. - IT from Kuvempu University Distance Learning.

## Visa

1. US (Business Visa) valid till "20-Dec-2019" with the number "56913586"
2. Passport with the number "K2627869" valid till "21-Feb-2022"

## Onsite Visit

Country : United States  
Client Place : Buffalo, New York  
Purpose : Training on Voyager 3.1 tool & Onsite Co-ordination  
Duration : Jan 2010 to Mar 2010

Country : Nigeria  
Client Place : Lagos  
Purpose : Consulting  
Duration : May 2017 to Till Date

## Professional Experience

### 1. FBN (First Bank Nigeria)

From May 2017 to till Date

First Bank Nigeria has an internal software development team to build the applications to use within the bank, below are the list of projects executed at FBN.

- SMS Recoup  
Bank sends the SMS alerts to the customers for the transactions performed on the account for which Bank pays the SMS Charges, the application is developed to charge the customer back for the SMS alerts sent. The application Reads the Excel / TXT / CSV files provided by the Network Service providers; consolidates the SMS count per account and dumps the data to the SQL and Finacle Database further to which the charge is calculated based on the number of SMSs sent per account.
- Permission Management  
Permission Management is the base web application. It is used for all application development for use within the bank. The default features such as Maker Checker Validation, CRUD operations on Users and Roles, Role access settings, portal and module settings, Basic error reporting, export to excel operation and so on are being developed as part of this application. Any feature proposed by the bank would be visited to validate if it can be included as base feature and then include the same.
- Monthly Statement Processing  
The application generates the statements for the transactions performed on the accounts and emails the statement to the respective account holder's email ID, due to the huge volume of accounts, previous implementation had performance issues, to overcome the performance issue this application was re vamped.  
The application pulls number of accounts to generate the statements for, then divides the statements in ratio to the processing servers available and the respective servers will process the statements accordingly.
- Money Gram Safe Pin Service  
The application is designed to facilitate the national / international money transfer operation. The receiver will approach the bank with the transfer pin that is received on his mobile and the teller has the Card Pin reader which will be handed over to the customer to enter the pin once the pin is validated the teller gets the transaction details and hands over the cash to the customer.

Environment:

- ASP.NET MVC, JQuery, JavaScript, C#, Windows Service, WCF, HTML, CSS, Bootstrap, Microsoft SQL Server.
- TFS 2012

### 2. Ecomm.dell.com

From May2014 to April 2016

Ecomm.dell.com is an online purchase path portal for consumers from multiple segments, this application deals with multiple languages and multiple countries. The application behaves in a different manner based on the country and language settings. It consumes the XML data provided by the previous segments such as OEM; ARB and presents the web page to the user based on the country and the products selected, and further communicates with the Commerce foundation to get the pricing and calculation later on checkout ecomm portal presents the data to the payments team to further process the payment.

Environment:

- ASP.NET, C# Web Services, JavaScript, HTML and CSS.
- TFS 2012

### 3. ARX Document Inventory Management Systems

From Feb2013 to Aug 2013

The ARX Application involves in managing the Documents related to loans, credit cards, checking and savings accounts. This application will be used by the branch employees in order to process the physical documents and have the computerized document in tiff format. Once the document is converted to Tiff format the metadata of the document is stored in the database, which will be linked with the physical file on the file system. All the documents will be provided to the application through a disk and windows service will take care of reading the files from the disk while the web application enables the users to Search/View/Download/arrange and print the documents in bulk.

**Environment:**

- ASP.NET, C#, Web Services, SQL Server, JavaScript, HTML and CSS, JQuery, Ajax
- Tortoise SVN (Version Control Tool)

### 4. DMD & LN

From June 2012 to Jan 2013

DMD and LN are the applications that helps one of the major Banking Sectors to digitalize the manual documents. The document would be available to the users in the PDF or TIFF format. The user will enter the data available in the documents and submit the documents. Any of the matching deed and mortgage documents will be merged to a single document and will be sent to the client as a flat file. Which will be used by the clients for further use

**Environment:**

- ASP.NET, C#, Web Services, SQL Server, JavaScript, AJAX, HTML and CSS
- VSS (Version Control Tool)

### 5. WBB and WBK at SLK Software

From January 2010 to May2012

WBB and WBK are two channels of the online banking application for Retail and Business users, WBB (Web Banking for Business) is the channel for the Business users to login; WBK (Retail Web Banking) is the channel for the Retail users to login to the Web banking application to perform the banking operations. This is the product named "Voyager 3.1" from FISERV, the product is customized and enhanced to meet the client requirement. The enhancements provided as part of this project are:

- BBFB (Banking Built for Business)  
BBFB is a Product which deals Accounts bundling system, it is provided for Business users who have Web banking enabled. Once the user completes the Needs Assessment using Needs Assessment System, this system will provide the recommended products to the user. Once the user accepts the recommendation the bundle will be created for the user. Once the bundle is created the tibco web services will provide the information to the WBB application. The WBB will display the Bundle Details with the charges for the bundled products where in the user can choose the best possible bundles based on the need and continue with the process else user can ignore the bundle selection and continue with the banking operations.
- External Account Loan Payment  
External Account Loan Payment application enables the users to make payment to the loan account in the bank from the external bank's checking account only When the user has a Retail Web Banking account with active Loans. The user transactions will be stored in Voyager DB, there will be a Batch file which runs every day at scheduled time and this batch file will take care of updating the Mainframe / Shaw Region.
- Finance Works  
Finance Works is about integrating the INTUIT Money Manager product with WBK, Money Manager is the tools which provides the statistics of the Income and Expenditure details in a categorized manner using the graphical representation. The integration was provided by allowing the user to register for the product and the registration details will be stored in the Voyager Database. To get registered for Finance Works user needs to have at least one Checking account as this will be the account which will be used to charge the user.

**Environment:**

- Voyager 3.1, ASP.NET, C#, Web Services, SQL Server, JavaScript, HTML and CSS
- Tortoise - CVS (Version Control Tool)

## 6. WLA at SLK Software

From July 2008 to Sep 2009

WLA is an Online loan application which is developed for one of the reputed Banks of United states to enable the users to apply for loans online. This application allows the user to save the partially filled application and complete the same at the later Stages. This application even allows the users to change the type of loan at any point of time. This application is integrated with the Web Banking application for Retail Users. The application takes care of validating the user details from the Mainframe Region using the WEB Services and posting the User data to the SHAW systems so that the respective teams can take the further required actions. There are multiple entry points to reach this application to apply for the loan.

- The available channels are:
  - Branch
  - Agents and
  - Customer on his own.

### Environment:

- VS 2005, SQL Server 2005, C#, ASP.NET, ADO.NET, HTML, CSS, JavaScript
- VSS (Version Control Tool)

### Personal Details

Father's name : Shivaram E  
Date of birth : 9th February 1984  
Marital Status : Married  
Permanent Address : 118/12, Sri Venkateswara Provision Stores, CDT Street, DV Market, Bellary-583101  
Languages Known : English, Hindi, Kannada, Telugu and Tamil.

### Declaration

I hereby declare that the above provided particulars are true to the best of my knowledge.

Place:  
Bangalore
